---

This book was one of the most popular books of its time. Written in 1943, the book was then updated in 1956. This was the second update, the first update being the 1958 edition. In the late 1950s, the book was re-released by a smaller publishing company, Minerva Press, and in 1960 the book was revised and re-written. By the mid-1960s, some large changes had been made to the book, which are noted in the footnotes. The name of the book was updated again in 1973 to be 'The Diving Manual' (for the Navy, the Royal Marines, the Army and the Air Force). The 1973 edition was the last edition of the book. In the early 1980s, G J Coates (a former Royal Engineer) published the book as a hardback book. In 1986, a paperback version of the book was released, and it is this version which is still in print. The book was released in a CD version in 2003 as an extra to the CD version of the updated version of the book (listed as 'The Diving Manual').
